HEATING & A/C EQUIPMENT

*Go Thru-the-Wall*

5320 Sunnyside Ave. Beltsville, MD 20705 • [www.wekingswell.com](http://www.wekingswell.com)

The background of the image is a bright, modern kitchen with white cabinetry, a stainless steel sink, and a window with green plants. A large, glowing pendant light hangs from the ceiling. In the center, there is a blue rectangular logo with white text. Below the logo, the words 'HEATING & A/C EQUIPMENT' are written in black. The main title 'Go Thru-the-Wall' is written in a large, blue, cursive font across the middle of the image. In the foreground, three rectangular, grey, grid-like units are displayed on a wooden surface. One unit is tall and narrow, while the other two are shorter and wider. They appear to be portable heating or cooling units.

# Thru-the-Wall Comfort for all types of MULTI-FAMILY CONSTRUCTION

### Easier to Service

Since the NCPU condensing unit is located closer to the indoor air handler, service and routine maintenance is much easier.

### Applications

The NCPU series condensing unit is designed for recessed or "Thru-the-Wall" applications such as high rise apartments and condominiums.

### Ideal for Replacements

Three models are now available with different cabinet dimensions to replace most brands no longer in production with little or no modifications required.

### Complete Compatibility

These condensing units are completely compatible with most major brands of indoor air handlers and coils.
