# V-Series Packaged Units

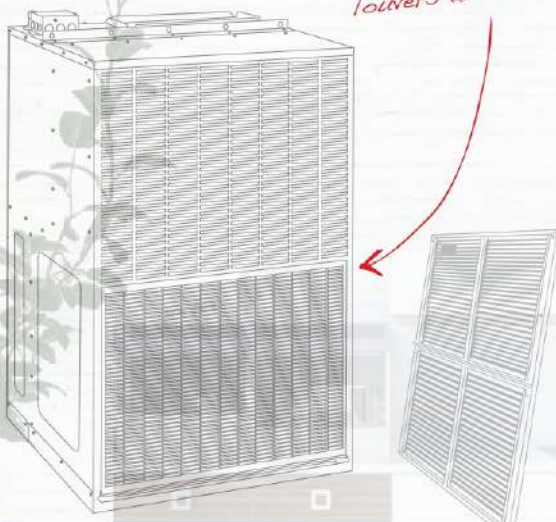

**Simple Installation,  
Simple Specification,  
Lower Cost of Ownership.**

**MADE TO WORK,  
DESIGNED TO FIT.**

Magic-Pak's design incorporates many smart features to preserve reliable operation, even when it's installed in unconditioned closet spaces & exposed to the coldest weather.

*Louvers built  
into equipment  
with optional  
architectural  
louvers available*

1. Sloped exhaust pipe reduces ice buildup on louvers & sends condensate back to the collector box.
2. 24-Volt electric heater and internal thermostat maintain temperatures inside hoses at 35-40°F, even in ambient conditions below 20°F. Patent-pending freeze shield™ technology prevents any blockage of condensate water in the drain trap.
3. Front or side-heating condensate connection.
4. Freeze Shield™ technology helps prevent blockage of any condensate water in drain trap.

**EVEN IN EXTREMELY LOW  
TEMPERATURES, THE V-SERIES™  
OUTPERFORMS THE COMPETITION.**
