NATIONAL COMFORT PRODUCTS

HEATING & A/C EQUIPMENT

COMPLETE COMPATIBILITY

These condensing units are completely compatible with most major brands of indoor air handlers and coils.

APPLICATIONS

The NCPU series condensing unit is designed for recessed or "Thru-the-Wall" applications such as high rise apartments and condominiums.

EASIER TO SERVICE

Since the NCPU condensing unit is located closer to the indoor air handler, service, and routine maintenance is much easier.

IDEAL FOR REPLACEMENTS

Three models are now available with different cabinet dimensions to replace most brands no longer in production with little or no modifications required.

SAVE ON INSTALLATION COSTS

Since the NCPU condensing unit can be installed through an outside wall on the same floor as the apartment or condominium, considerably less copper piping, refrigerant and electrical wiring is required, resulting in substantial savings over a typical roof or ground installation.
